

Suction Catheter Closed System (24 hr. / 72 hr.)

A - 3037

- Used to maintain ventilation and oxygen therapy while suctioning in mechanically ventilated patients.
- Minimises the risk of Ventilator Associated Pneumonia (VAP).
- Kit comes with 3 easily replaceable catheters, minimizing the need to replace entire suction system every 24-72 hrs.
- Catheter with lateral eyes, smooth tip and depth markings for maximum patient comfort.
- MDI port provides an effective, quick and convenient way of drug delivery.
- Irrigation port with one way valve allows lavage and irrigation of the suction catheter.
- On/off valve allows suction catheter tip to be isolated and creates an enclosed cleaning chamber.
- Transparent connectors and durable sleeve facilitates catheter manipulation and prevents infiltration of blood and sputum.
- 360° swivel elbow enables rotation for enhanced patient comfort and reduces torque.

Sterile / Disposable / Individually Packed.
